(54) Title: WOUND DRAINAGE DEVICE

(57) Abstract: In a wound drainage device (10) for discharging exudate originating from a wound with the aid of reduced pressure, the vacuum is created indirectly in a collection container. The collection container (16) is arranged in a vacuum chamber (14), with the space (32) between collection container (16) and vacuum chamber (14) being in communication with gas-transformer means
